

Suhavi Sunderlal

Product Designer who designs, codes and ships

suhavisunderlal.com | suhavisunderlal33@gmail.com | +91 88006 97788 | Noida, India

I'm a product designer at Oren, an enterprise sustainability platform, where I own design end to end. I start at the messy, half-defined problem and carry it through research, flows and UI, into a design system that holds it all together. I design, code and raise my own PRs with Claude Code, so what I design is what actually ships. Healthcare is the work I keep returning to. I took my MRes in Healthcare and Design at the Royal College of Art with Imperial College London, and I am designing Forget Me Not, a project for dementia care.

EXPERIENCE

Product Designer

Sep 2022 - Present

Oren, enterprise sustainability platform, orennow.com

- Own design end to end for Oren Sustainability Hub, the ESG platform used by teams at Adani, Blackstone and Thomas Cook, with 1,300+ active users.
- Turn dense disclosure frameworks like BRSR, GRI, TCFD and CSRD into reporting workflows non-specialists can finish on their own.
- Built Oren's first design system: tokens, components, usage docs and a Storybook the developers build from.
- Design with Claude Code daily: prototypes, design system upkeep, and custom skills for research and screen exploration. Ideas get tested as working screens, not static mockups.
- Partner with PMs, engineering, delivery and sales from discovery through release, using backend knowledge to settle feasibility early.

Co-founder and Builder

Mar 2026 - Present

EkhoPost, AI-powered social media publishing tool, app.ekhopost.com

- Built and shipped it with one co-founder, from the ground up: research, brand identity, design system, product design and the full code.
- Live product with AI post and image generation, WhatsApp integration, scheduling and automated publishing across platforms.

Design Consultant

Dec 2025 - Present

Lighthouse Health Solutions, healthcare

- Consult on product development and dementia care projects; currently designing a children's book for the company.

Research Assistant, UX

Feb 2022 - May 2024

Imperial College London, Department of Computing

- Designed a menopause care web application, from research through UI, giving women intuitive tools for informed health decisions, including HRT risk assessment.

Earlier

- Industrial Design Intern, **INDQ Product Design Studio**, medical technology and robotics (2022). Product Design Intern, **Webby Toys** (2021).

EDUCATION

MRes Healthcare and Design

Royal College of Art with Imperial College London, 2023 - 2025, part time

Professional Diploma, Industrial Product Design

Pearl Academy, 2018 - 2022

BA Psychology (Honours)

Indira Gandhi National Open University, 2018 - 2022

AWARDS AND RECOGNITION

- Won the Outskill AI Hackathon with my team, Sep 2025. About 800 participants; we built a complete, live fitness app.
- Special Jury Award, Socially Sensitive and Relevant Project, Pearl Academy.
- Lexus Design Award India 2022, Student Conceptual shortlist.
- Taiwan International Student Design Competition, top 300 of 21,901 entries.
